- Feed one end down the hole closest to the wall allowing approx. 300mm for tying.
- Tie off as shown in the Figs 6 and 7.
- Feed the cord through the remaining holes as shown in Fig 5.
- To tension the cord, hold the free end tightly. Starting at the line closest to the wall, pull down firmly on the middle of the cord. Repeat the process on the next cord, working your way outwards removing any slack. Repeat the process until there is sufficient tension in the cord.
- Tie the loose end as shown in Figs 6 and 7. Trim the ends of the cord, leaving 100mm to be fed through the hole as shown in Fig 7.
