M8 x 110  
2 off

Bolt  
M8 x 90  
2 off

Lock Nut  
M8  
4 off

*Tek Screw must only be removed if the length needs to be adjusted*

\*\*Clotheslines 2400mm or less use a 1 piece spreader bar.  
Spreader bar assembly consists of 2 Spreader Bars and 1 Joiner

**Layout:**

- Dig 2 holes, 200mm diameter, for the posts. The hole centres are 160mm less than the length of the clothesline purchased (e.g. 2240mm for a 2400mm clothesline, or 2840mm for a 3000mm clothesline).
- The hole depth depends on the desired height of the clothesline. Ensure that the holes are deep enough that the spreader bar is level with the users head.

Figure 1 – Layout.

**Assembly:**

- Assemble the rear spreader bar (clotheslines larger than 2400mm).
- Bolt the one side of the clothesline to the legs as shown in Figure 2.
- Install the front spreader bar as per wall mount instructions.
- Bolt remaining clothesline to the opposite leg.
- Set the poles in the ground with concrete. Ensure the posts and spreader bar are level
- Leave concrete to set as per manufacturer's instructions before assembling or using the clothesline.
- Refer to the Wall Mount Instructions for details on the cord installation.
